PROJECT NUMBER PS-13

PROJECT TITLE Pierce Fire Engine Tanker/Pumper

PROJECT DESCRIPTION Pierce Fire Engine Tanker/Pumper

PROJECT LOCATION Fire Department

PROJECT BENEFITS Conforms to adopted plan, goals, objectives & policies.

COMMENTS The recommendation of the Fire Department is to place the current 2002 Pierce Contender fire engine into reserve status and replace it with a new pierce fire engine. Due to the age of the engine it would better serve the organization if it were placed in a position where it did not receive as much use, allowing it to be used on "the big fires". This would extend the usefulness of this apparatus and put our personnel in a more reliable first in apparatus.

PROJECT TITLE Booster Station/Water System Tie-in (55-017 & 55-056)

PROJECT DESCRIPTION Booster station of hydro pneumatic tank for in-line tie-in

PROJECT LOCATION Florence

PROJECT BENEFITS Alleviates substandard conditions and deficiencies

COMMENTS The water system south of the Gila River can only serve a portion of the area north of the Gila River. Technical analysis will support the most cost beneficial system to be used & prevent backpressure problems with the area south of the Gila River. Booster station in parallel appears to cost prohibitive when only minor pressure increase is needed.
